I was able, yesterday, to verify that fact, more important than wars or mors of wars. Keen observation and expert testimony back up the assertion that the blonde crop of 1915 is quite up to the average in this city. Which is Reason 1,762 for estab-

lishing your happy home in New York instead of in Chicago. Come to think of it, though, there may be a better chance for happy homes in the latter town. For there's a scarcity of blondes in the Windy City. And from the time of Helen of Troy to the time of Gaby of the Lilles,

yellow-haired ladies and domesticity have mixed like fire and tow. So, perhaps Chicago should be resigned to her horrible fate. Perhaps she should, but she isn't. I won't keep you in suspense. We found her. And here are the code directions for discovering blond beau ties in New York:

The way to see a lovely blonde is to look in the right place. Go to the Blonde Belt, which is bounded on the north by Fiftyninth Street, on the south by Thirty-fifth Street, on the east by Sixth Avenue and on the west by Eighth Avenue. All your scouting should be done within that area. Another point which should encourage you is the undoubted fact that many blondes cannot be listed as shy game. With your trusty bill-folder in your hand search the roof gardens, the tea dances, the hotel dining rooms, the theatres. It is written, "Seek and you shall find."

Queer how the girls are all crazy over red hair; it used to be a sort of disgrace. But nothing makes such a hit, in the leng run, as a regular blonde, the blue-eyed kind."

Comptroller Attacks Plan to Levy Revenue From \$4,000,-

on Autos, Trucks, Signs and Vault Privileges.

Evening World reporter that personal taxes ought to be wiped out entirely in New York City. He says the tax rolls should be purged and that the city should, if necessary, seek other more reasonable sources of revenue. "What would you suggest as an alternative, if any?" the Comptroller

was asked. "That would depend entirely upon the city's finances," replied Mr. Pren-dergast. "If, after having abolished the personal tax, the city should need money, it would not be very difficult to find other good sources of revenue.

"For instance, there might be a heavier tax on autos and on heavy auto trucks which use up the city's streets. Then there might be a heavier tax on big advertising privileges. Among these are the big posters seen in all parts of the city. Signs could also be made to pay more.

"Again, the city could perhaps collect more for the vault privileges, at a which are very extensive. I mention demeans of obtaining revenue.

The Comptroller was asked if he was prepared to suggest the abolition of the personal tax, and he replied that he didn't have it immediately in mind. It is likely though that are seen as less than a seen a mind. It is likely, though, that as a result of the great wave of indignation which has resulted from the announcement of the new personal tax levies city officials may be induced to abolish the tax altogether after a short trial.
